

## Our Products Reflect Stewardship

Product stewardship is our focus. We actively pursue ways to minimize the impact of our products on the environment. This means designing products that save resources, have longer life, use clean manufacturing, meet indoor air requirements, recycle easily and include many other sustainable attributes.

We base our business on producing environmentally-friendly goods that enhance the lives of our customers and bring value to the markets we serve. Our emphasis on low-emitting products protects indoor air quality through the achievement of the Business and Institutional Furniture Manufacturer's Association (BIFMA) Furniture Emissions Standard (FES). Many of our products earn the SCS Indoor Advantage™ or Indoor Advantage Gold™ marks from Scientific Certification Systems (SCS) for meeting this standard. Additionally, most National products meet the multi-faceted criteria set forth in the BIFMA e3 Sustainability Standard and are certified to the level™ program by SCS. These certifications add the assurance of compliance by independent third parties.

For comprehensive Environmental and Product Profiles that include LEED® point contribution information as well as a most recent listing of certified products, visit [www.NationalOfficeFurniture.com](http://www.NationalOfficeFurniture.com). Conference tables 54" or 60" wide are level™ 1 certified and are available with FSC-Certified wood options.

## Our Products Reflect Stewardship

By giving customers the option of Forest Stewardship Council (FSC) certified wood, we offer products that are not only economically viable, but are environmentally responsible and socially beneficial. Likewise, we are exploring new ways to incorporate rapidly renewal resources, such as bamboo, cork and other plants with short growing cycles. National casegoods include a recycled material content of at least 82 percent. A wide range of 100 percent recycled polyester choices are available for upholstered seating products. Our packaging is 100% recyclable and our casegoods packaging contains an average of 60 percent recycled content, while our seating packaging contains an average of 50 percent recycled content.

What's more, our manufacturing facilities are registered to the ISO 14001 standard. This management tool enables us to identify and control the environmental impact of our operations, continually improve our company's environmental performance and systematically set environmental objectives and demonstrate their achievement.
