Cleaning Code and Finish Definitions

W Clean only with water-based cleaner or foam upholstery cleaner using the minimum amount of liquid. Do not use solvents.

WM Clean only with water-based Crypton® cleaners or detergent using the minimum amount of liquid. Do not use solvents.

S Clean only with solvent-based cleaner. Do not saturate. Do not use water.

WS Clean only with water-based or solvent-based cleaner. Do not saturate.

Bleach Cleanable Cleanable with a 4:1 or 10:1 water-to-bleach dilution for the lifetime of the product.

Cleangene + Silicone™ A permanent finish for polyurethane fabrics, providing high-level stain resistance (including indigo dyes from denim and ink stains) and cleanability with bleach, as well as most popular quaternary and phenol germicides typically used in healthcare settings.

Crypton® A durable stain-resistant high-performance upholstery with a built-in coated moisture barrier and a silver-ion-type antimicrobial.

Nano Stain Resistant A nanotechnology-based permanent performance stain-resistant finish based on C6 chemistry, which is designed to reduce the use of environmentally harmful fluorochemicals. Can be bleach cleanable if the substrate is bleach treatable.

PBG+® with Silverguard® A high-performance coating for vinyl that is bleach cleanable, stain- and ink-resistant, and allows the use of most quaternary and phenol germicides typically used in healthcare settings. PBG+® with Silverguard® uses silver-ion technology to inhibit mold, mildew and bacteria. It also contains a flame-retardant additive.

Stain Repellent A generic semi-durable oil- and water-repellent finish.
