DWELL TIMES	3 MINUTES	10 MINUTES	5 MINUTES	2 MINUTES

The above patterns may be cleaned with bleach following the proper ratio of 80% water : 20% bleach with a 10 minute dwell time.

How does EPA know that these products work on SARS-CoV-2? While these products have not been tested against SARS-CoV-2, the cause of COVID-19, they are expected to be effective based on:

- Demonstrated efficacy against a harder-to-kill virus;
- Qualified for the emerging viral pathogens claim; or
- Demonstrated efficacy against another human coronavirus similar to SARS-CoV-2.

SARS-CoV-2 is a new virus. Such pathogens are often unavailable commercially for laboratory testing.
