

FRINGE LOUNGE COLLECTION DESIGN PERSPECTIVE

The Fringe collection of lounge furniture offers extreme flexibility and smart design features. Applicable for commercial spaces, community areas, education settings, and healthcare environments, Fringe offers seating and table solutions that can be combined to create large configurations or used separately to develop individual stations. From ottomans, club chairs, benches, high and mid backs, and cove units, to occasional, inline, and bistro tables, Fringe has an extensive and diverse offering. With the versatility to provide privacy and openness, comfort and style, Fringe has the elements to create an endless amount of straight runs and serpentine configurations to answer any need.

“Fringe responds to the way individuals interact within the workplace environment. Sometimes they need spaces to collaborate and sometimes spaces must have privacy. We are constantly challenging ourselves to think of what’s next, and with Fringe, its evolution has been extraordinary. Since it first came onto the market through its existence today, we’ve addressed comfort, acoustics, privacy, and flexibility. We’ve added new leg materials and base styles as well as new configurations and pieces to keep it relevant for today’s market. Fringe is a single collection that moves the way an organization moves.”
