

FRINGE LOUNGE COLLECTION DESIGN PERSPECTIVE

The Fringe lounge collection offers seating and table solutions that can be combined to create large configurations, or used separately to develop individual stations. From ottomans, club chairs, benches, high and mid backs, and cove units, to occasional, inline, and bistro tables, Fringe has an extensive and diverse offering. Its lounge and table components can be combined to create an endless amount of straight runs and serpentine configurations. Applicable for commercial spaces, community areas, education settings, and healthcare environments, Fringe has the versatility to provide privacy and openness, comfort and style.

“Fringe responds to the way individuals interact within the workplace environment. Sometimes they need spaces to collaborate and sometimes spaces must have privacy. We are constantly challenging ourselves to think of what’s next, and with Fringe, its evolution has been extraordinary. Since it first came onto the market through its existence today, we’ve addressed comfort, acoustics, privacy, and flexibility. We’ve added leg materials and base styles as well as new configurations and pieces to keep it relevant for today’s market. To address healthcare needs, we’ve also added a plinth base and optional clean out to assist with thorough and efficient cleaning demands. Fringe is a single collection that moves the way an organization moves.”
