Work Surface Assembly

Note:
- It is recommended that more than one person be used to unpack, move, & assemble worksurfaces.

1. Unpack the Worksurface
- Locate the hardware bag containing the small mounting brackets and screws.
- Unsecure the large mounting brackets from the bottom of the worksurface. (The brackets are temporarily secured to bottom side of the worksurface to prevent damage during shipping and handling).

2. Attach Table Legs (Sold Separately)
- Attach Legs to the bottom side of the worksurface following the lag assembly instruction sheet included with the metal legs.

3. Assemble the 2 Large Flat Brackets to the Top of the Upholstered Spine
- Identify the side/direction the work surface is to be attached and extended from the spine.
- Using a black marker & sharp pointed ice pick locate and identify the (3) prebored mounting holes for each of the (2) brackets on the top surface of the upholstered spine. See Illustration below for the prebored hole locations per model.

Recommended Tools
- Tape Measure
- Black Marker
- Sharp Pointed Pick
- X-Acto Knife or Scissors
- Screw Gun
- Phillips Driver Bit
- Level

Package Contents Qty.
29”x48” Rectangular Worksurface 1
Flat Brackets 2
#10x1 PH Phillips Screws 8

Proper product installation, in accordance with these instructions, is the responsibility of the installing agent. If you have any questions concerning these instructions, please call National Customer Service.
Bracket Attachment Locations for Model N87AAA36
*Make certain the correct side of the spine is identified that the table is to be extended. The upholstery will be cut and can not be repaired if incorrect side is marked.

- Using a X-Acto knife or scissors, cut a small ½” diameter hole in both the upholstery cover and foam around all (6) attachment hole locations.

- Align the brackets with the prebored holes in the top of the upholstered spine securing each bracket using (3) #12 X 2 ¼” flathead screw as shown in the illustration below.

- After Brackets are attached move to assembly STEP #4.
Work Surface Assembly

- Using a X-Acto knife or scissors, cut a small ½” diameter hole in both the upholstery cover and foam around all (6) attachment hole locations.

- Align the brackets with the prebored holes in the top of the upholstered spine securing each bracket using (3) #12 X 2 ¾” flathead screw as shown in the illustration below.

• **Bracket Attachment Locations for Models N87LALAR & N87L5ALAR**

*Make certain the correct side of the spine is identified that the table is to be extended. The upholstery will be cut and can not be repaired if incorrect side is marked.*

• **Using** a X-Acto knife or scissors, cut a small ⅛” diameter hole in both the upholstery cover and foam around all (6) attachment hole locations.

• Align the brackets with the prebored holes in the top of the upholstered spine securing each bracket using (3) #12 X 2 ½” flathead screw as shown in the illustration below.

• After Brackets are attached move to assembly STEP #4.
Proper product installation, in accordance with these instructions, is the responsibility of the installing agent. If you have any questions concerning these instructions, please call National Customer Service.
4. **Attach 29” X 48” Worksurface to Upholstered Spines**
   - Set and center the 29” X 48” worksurface on top of spines aligning the prebored holes in the bottom of the worksurface with slotted holes in the two attachment brackets.
   - Securely fasten (4) #10X1” panhead screws through each bracket into the bottom of the top without overtightening causing the screw to strip out the wood. Repeat this process for both brackets on each side. (See illustration below)

5. **Align, orient, level ganged assembly in desired final position.**
   Install electrical option if selected
