**Note:** Complete this assembly before center beams at assembled.

1. Using the provided M8x45 bolts attach one end of the wire manager as shown in **Figure A**.
   
   ![Figure A:](image)

2. Move the second unit into the final position and use the remaining M8x45 bolts to secure the second unit as shown in **Figure B**.
   
   ![Figure B:](image)

3. Use the provided cover to hide the exposed holes on the double depth units.
