**Assembly Instruction**

**Note:** This assembly instruction will cover all configurations of the Alloy Adjustable Height End of Run Panels.

1. Insert the provided glides into the bottom of the panel.

2. Secure the provided inner brackets to the panel using #8 x 1 wood screws as shown in **Figure A**.

   ![Figure A](image)

3. Attach the end of the run panel to the Alloy adjustable height unit as shown in **Figure B**. Use the self drilling screws to secure the outer bracket to the inner bracket. It is recommended to use a clamp to pull the brackets tight before securing.

   ![Figure B](image)

4. Adjust the glides and verify the panel is vertically plumb.
