### Material Identification

<table>
<thead>
<tr>
<th>Material</th>
<th>Identification</th>
<th>Recyclable</th>
<th>Biodegradable</th>
<th>Where Used</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aluminum</td>
<td>A silvery white metal, sometime painted or coated, non-magnetic</td>
<td>Yes</td>
<td>No</td>
<td>Bases, Arms, Frames</td>
</tr>
<tr>
<td>Steel</td>
<td>A magnetic metal that may be coated or painted.</td>
<td>Yes</td>
<td>No</td>
<td>Bases, Arms, Backs, Frames, Seats, Controls, Hardware</td>
</tr>
<tr>
<td>Zinc</td>
<td>A bluish-white, non-magnetic metal; much heavier for its size than aluminum generally not painted.</td>
<td>Yes</td>
<td>No</td>
<td>Hardware</td>
</tr>
<tr>
<td>Laminate</td>
<td>A thin top sheet of treated paper heavily saturated with melamine resins having a dark colored edge regardless of face color and adhered to a wood core.</td>
<td>No</td>
<td>No</td>
<td>Tablet Arms</td>
</tr>
<tr>
<td>Wood</td>
<td>Solid wood, plywood, medium density flake board or particle board.</td>
<td>Yes</td>
<td>Yes</td>
<td>Frames, Backs, Seats</td>
</tr>
<tr>
<td>Fabric</td>
<td>Manufactured fibers woven into cloth or mesh.</td>
<td>No</td>
<td>No</td>
<td>Covering for Backs, Arms, Seats, Seating, Piping</td>
</tr>
<tr>
<td>Foam</td>
<td>Polyurethane Foam. Recognized by textured curved or flat surfaces, easily compressed with finger pressure.</td>
<td>No</td>
<td>No</td>
<td>Seat, Arm and Back Cushions</td>
</tr>
<tr>
<td>Plastic 3:</td>
<td><strong>Vinyl (Polyvinyl Chloride or PVC)</strong>. In addition to its stable physical properties, PVC has excellent chemical resistance, good weatherability, flow characteristics and stable electrical properties. Bottles and packaging sheet are major rigid markets, but it is also widely used in the construction market for such applications as pipes and fittings, siding, carpet backing and windows. Flexible vinyl is used in wire and cable insulation, film and sheet, floor coverings synthetic leather products, coatings, blood bags, medical tubing and many other applications.</td>
<td>Yes</td>
<td>No</td>
<td>Covering for Backs, Arms, Seats, Piping</td>
</tr>
<tr>
<td>Plastic 6:</td>
<td><strong>Polystyrene (PS)</strong>. Polystyrene is a versatile plastic that can be rigid or foamed. General purpose polystyrene is clear, hard and brittle. It has a relatively low melting point. Typical applications include protective packaging, containers, lids, cups, bottles and trays.</td>
<td>Yes</td>
<td>No</td>
<td>Back Inserts, Seat Inserts</td>
</tr>
<tr>
<td>Plastic 7:</td>
<td>Other. Use of this code indicates that the plastic in question is made with a resin other than the six other plastics within the &quot;Resin Identification Code&quot; categories, or is made of more than one resin listed within the list, and used in a multi-layer combination. Includes Nylon.</td>
