

IT'S EASY TO CHOOSE EARTH-FRIENDLY FABRICS WITH NATIONAL.

AT NATIONAL, OUR TEXTILE OFFERING INCLUDES FABRICS WITH A REDUCED ENVIRONMENTAL IMPACT.

Choices include fabrics with significant recycled content, as well as PVC or chrome-free. Some bear the Terratex name which signifies they are made of 100% recycled fiber and use a fabric production process that reduces waste and emissions. Others are made of Repeve yarn, a recycled polyester yarn that uses the U Trust verification program which ensures that Repeve recycled fibers are traceable, transparent and certifiably sustainable. Additionally, all National in-line fabrics have no added flame retardant chemicals (FRs).

Our alliance partners, Arc-Com, Stinson, Maharam, Momentum and Ultrafabrics, also offer upholstery choices that feature sustainable characteristics. For additional details, please refer to their websites.

BLOCKAIDE®

Soil and stain inhibitor that provides excellent repellency to oil and water and helps repel spills and makes clean up easier.

- Prevent stains, dirt, and grime from penetrating the fabric
- Creates a protective shield that repels liquid, dirt and grime

BLOCKaide is a registered trademark of Interface, Inc.

ECO INTELLIGENT®

Cradle to Cradle^{CM} Gold product designed and manufactured for recyclability.

- Antimony-free
- Chlorine-free
- Perpetually recyclable
- Made with sustainable manufacturing practices

REPREVE®

- Reduces energy consumption and conserves petroleum-based resources by offsetting the need to produce virgin synthetic fibers, providing a reprieve for our environment.
- U Trust™ verification program ensures that Repreve recycled fibers are traceable, transparent and certifiably sustainable.
- Consistent yarn quality adheres to Unifi's first-quality standards.
- Repreve supports environmental non-profit organizations through its "Repreve Gives Back" campaign.

Repreve and U Trust are trademarks of Unifi, Inc.

TERRATEX®

Each Terratex fabric must meet these four criteria.

- Made of 100% post-consumer and/or pre-consumer fiber, or compostable materials.
- Made using processes that reduce waste, emissions, energy water usage, and toxic by-products.
- Meets or exceeds the same quality standards of fabrics manufactured using virgin materials and conventional processes.
- Made of a single fiber type, without backcoating, so that it too can be recycled or composted.
